

CAN YOU SPOT THE BEHAVIOUR?

Put a number in the circle next to the chicken doing one of their favourite things.

Chickens love to:

- 1 Perch to keep their legs strong
- 2 Flick dust into their feathers and then shake it out to clean themselves (this is called dustbathing)
- 3 Scratch and forage to keep entertained

COLOURING IN

Did you know that chickens that are farmed for meat are a different breed to the chickens that lay eggs?

Meat chickens have white feathers in Australia, but here you can get creative and choose any colour you like!

Happy colouring and we hope you learn something new about chickens today.
